2015 Prices for Third World Countries

DLINE- The Information Gateway to Scientific and Technology Innovation

Published by the DLINE INC, USA, UK and India Internationally Reviewed and Indexed Journals

DLINE Journals have Been Publishing High Quality Scholarly Papers and Introduce The State-of-the Art Research in Different Perspectives and Design the Scientific Systems to Optimize the Existing and to Develop Innovative Paradigms. DLINE Publishes Eminent and Reviewed Journals in Science, Engineering, Technology and Management.

Features of DLINE journals

- Access to PDF Full-Text Articles from Current Content and All Online Back Files Published Since 2003.
- Access to Online Early Articles, i.e., Peer-Reviewed Articles published Online before the Print Issue is completed.
- Archival Access to Paid-For Content, Where DLINE has the Rights to Deliver
- IP and/or Remote User Access/Password Authentication.
- Usage Statistics.
- Full Text Papers are Searchable for Author, Title, Keywords, Journal Name and Year/Period.
- In 2015 DLINE Publish 21 Reviewed Journals in Print as well as Online.

Conference Database

Many international conference proceedings remain inaccessible to most researchers. Thus, the DLINE offers full text access to conference proceedings. The DLINE publishes significant conference proceedings. Every year the number of conference papers added runs into several hundreds. The cost of each conference paper is thus very less and it is more cost effective. This full text is supplemented by powerful indexing and linking.

DLINE Journals (GROUP A)

Journal of Digital Information Management (JDIM)
http://www.dirf.org/jdim
ISSN: 0972 7272
2015 Publication Frequency

Editors: Daisy Jacobs, University of Zululand, South Africa and Stephanne Bressanne, National University of Singapore

The Journal of Digital Information Management (JDIM), a bimonthly Journal of Digital Information Science and Technology, has been published since March 2003. Sponsored by the Digital Information Research Foundation, it concentrates on all aspects of Digital Information Management, and covers digital information processing, Digital content management, Digital world structuring, Digital libraries, Metadata, Information management and other related fields. An international peer-reviewed Journal, JDIM contains original research papers, ongoing research, technology reviews, reports on work-in-progress, short notes and announcements of forthcoming events. It acts as a portal to the digital information world.

International Journal of Web Applications (IJWA)

Editor: Simon Berkovich, George Washington University, USA

The aim of this international journal is to provide a forum for original and significant contributions in the field of World Wide Web and its recent technologies. This journal is a forum for scientists, engineers, and practitioners to present their latest research results, ideas, developments and applications in Information retrieval on the web, Information Sciences, Artificial Intelligence, Mobile Computing, Networking, Web Content Mining, Health Informatics, Bioinformatics and IT Applications across disciplines.

Journal of E-Technology (JET)

Editor-in-chief: Ezendu Ariwa, Bedfordshire University, UK

Journal of E-Technology is a scholarly journal in E-technology and its applications. It publishes original and scholarly papers after rigorous peer reviewing. The JET publishes research papers, reports, reviews and book reviews.

Journal of Networking Technology (JNT)

In the modern high performance computing systems, innovative as well as hi-tech research is required to address the challenges in the networking. The Journal of Networking Technology will act as a platform to publish and disseminate the cross cutting research in networking systems.

Journal of Intelligent Computing (JIC)

The aim of this international journal is to provide a platform for original and significant contributions in the field of Intelligent Computing in its wide scope. Intelligent Computing is taken here to include theory, algorithms, applications and technologies. This journal is a forum for scientists, engineers, and practitioners to present their latest research results, ideas, developments and applications in Information retrieval on the web, Information Sciences, Artificial Intelligence, Mobile Computing, Networking, Web Content Mining, Health Informatics, Bioinformatics and IT Applications across disciplines.

Journal of Multimedia Processing and Technologies (JMPT)

The Journal of Multimedia Processing and Technologies (JMPT) aims to provide a multi-disciplinary forum to present and discuss theory and research, development, architectures, networking, system support tools and applications as well as case studies of multimedia and hypermedia. It also features experimental and survey articles. It seeks to fill the gap that exists between several fields and communities such as image processing, video processing, audio analysis, information retrieval and understanding, data management and mining, security, and education. The journal is intended for academic researchers, practitioners, industrial professionals, consultants, managers, students, educators, policy makers and engineers working in the field and/or is involved in multimedia system research, design and applications.

Journal of Information Technology Review (JITR)

Editor: Veli Hakkoymaz, Fatih University, Turkey

Journal of Information Technology Review is a scholarly journal in the Information Technology and its applications. It publishes original and scholarly papers after rigourous peer reviewing. The R & D has been transforming the Computing paradigms and technology in multidimensional directions. Research in the Information Technology is distributed, heterogeneous, and multidisciplinary. The Journal of Information Technology Review characterize the innovative IT, by addressing the significant areas and themes in Information Technology.

Journal of Information Security Research (JISR)

http://www.dline.info/jisr

Editor-in-chief: Victor Ralevich, Sheridan Institute of Technology and Advanced Learning, Ontario, Canada

Papers offering original and innovative research contributions in information systems security and related domains are published. The primary focus is on original, high quality, and unpublished research- and implementation-related contributions.

International Journal of Computational Linguistics Research (IJCLR)

http://www.dline.info/jcl

Editor-in-chief: Aladdin Ayesh, DeMontford University, UK

International Journal of Computational Linguistics Research is a scholarly journal in Computational linguistics and text mining including natural language processing.

International Journal of Information Studies (IJIS)

http://www.dline.info/ijis

Editor-in-chief: Sulaiman Alreyaee, AISB University, Riyadh

The International Journal of Information Studies (IJIS) seeks the advancement of the knowledge in the expanding field of information studies. Our mission is to attract the highest quality theoretical and applied research in the field of information studies, including information science, management, retrieval, analysis, systems, theory, applications, and policy, as well as in the field of human-computer interaction.

Journal of Information & Systems Management (JISM)

Editor-in-chief: Saravanan Muthaiah, Multimedia University, Malaysia

The Journal of Information & System Management (JISM) aims to provide a multi-disciplinary forum to present and discuss theory and research, development, architectures, networking, system support tools and applications as well as case studies of information and system management, information and data management, information and system implementation and related issues.

Journal of Data Processing (JDP)

Editor-in-chief: Mohd Nazri, IsmailUniversiti Kebangsaan, Malaysia

This journal aims to inspire a change in the way researchers might think about different data processing problems in general, by looking for patterns, symmetries, and equivalences, and exploiting these so that answers to the questions raised.

Journal of Information Organization (JIO)

Editor-in-chief: Laurence Rodrigues do UFG/JataíUFSCar, Brazil

Organizing information is a bottom-line issue for establishing frameworks for thought used in research and teaching across scholarly disciplines. The applications require well-thought-out conceptual structures which must be developed by beginning from scratch or by refining existing knowledge organization and information processing systems. There is a good scope for working on the issues such as interoperability, interface, ontologies, taxonomies, solving complexities and so on.

The electronic systems are expected to have a significant impact on the lives of people in the coming years. The Electronic technologies require specific power electronics capabilities to convert the power generated into useful power that can be directly interconnected with the utility grid and/or can be used for consumer applications. The mission of the Journal of Electronic Systems is to publish high scholarly research in electronic systems from the macroscope through the microscopic levels.

(GROUP B)

Electronic Devices (ED)

Electronic Devices (ED) publish papers in Electronic and Electrical Engineering. Subscription Price: Rs.2800 (for Print and Online)

Signals and Telecommunication Journal (STJ)

Signals and Telecommunication Journal publish papers in Electronics and Communication Engineering. Subscription Price: Rs. 2800 (for Print and Online)

Progress in Computing Applications (PCA)

Progress in Computing Applications publishes papers in Electronic and Electrical and Computer Engineering. Subscription Price: Rs. 2800 (for Print and Online)

Progress in Machines and Systems publishes papers in Mechanical and Systems Engineering. Subscription Price: Rs. 2800 (for Print and Online)

Progress in Signals and Telecommunication Engineering publishes papers in Electronics and Communication Engineering. Subscription Price: Rs. 2800 (for Print and Online)

Transactions on Machine Design publishes papers in Mechanical and Systems Engineering. Subscription Price: Rs. 2800 (for Print and Online)

Editor-in-chief: Michael E. Whitman, Kennesaw State University, USA

Information Security Education Journal publishes papers in Information Security.

DLINE has back issue stock of journals. We hold older volumes.

Single Issues/Single Articles
Individual article can be purchased either online or print.

For a sample copy of the journal issue, please send a Mail to:
subscription@dirf.org or director@dline.info

Full Text Access
DLINE offers access to the content full text either by user name and password or IP authentication.

Subscription
DLINE offers special subscription rates to Indian subscribers at heavy discounted prices.

The DLINE journals are available both in the package mode as well as on individual subscriptions.

The Pricing details are as follows:

Option 1

➢ Individual Journal - Print (Online Free) - Rs. 3800/- for any one Journal in Group A
  Individual Journal - Print (Online Free) - Rs. 2800/- for any one Journal in Group B

➢ Individual Journal (only Online) - Rs. 2400/- (for each of the selected journal)

Option 2

➢ Journal package Print (Online Free) - Rs. 72800/- For Package Discount is Rs. 21800.
  After discount it is **Rs. 51000/- (for all 21 journals)**

➢ Journal package Online Only - Rs. 38500/- (for all 21 journals)

Option 3

➢ **Any Five Journals Cost Rs. 15000 (For Every Additional Journal Please Add Rs. 2900 for Group A and Rs 2200 for Group B)**

➢ **Any Nine journals cost Rs. 26000 (For Every Additional Journal Please Add Rs. 2800 for Group A and Rs 2200 for Group B)**

Subscription in the form of demand draft or cheque payable at Chennai in favor of:
 "Digital Information Research Foundation"

Payments can also be made using credit card at the link
