ABSTRACT

This research aims to look at trends in writing published by Sinta-2 accredited library journals managed by universities. This research uses co-word analysis in VosViewer by taking data from 2018 - 2023 in each journal. When trends of the writing publication are mapped, the strength of the journal can be interpreted. It is also possible to see whether the published articles are in accordance with the declared scope so that later recommendations for expanding the scope of the journal.
