

Editorial

We present the first issue of this tenth volume of the **International Journal of Information Studies**. This issue has the below described research papers. In the first paper on **“Comprehensiveness of Digital Information in Digital Age – A Survey on Research Trends in National Law School of India University”** the author *Mahesh Yaranal* has discussed the Digitization for the Inter disciplinary works. The authors have further addressed the limitations and also focused the the breadth versus depth of legal research in the digitization process.

In the next paper on **“Artificial Intelligence, Computer Assisted Instruction in Basketball Training”**, the authors *Zhao* and *Xie* have introduced the concepts of artificial intelligence computer aided teaching technology and its main function in the actual basketball training teaching. With the help of the questionnaires the authors have produced the research results of artificial intelligence computer assisted instruction in basketball training.

Wang in the last paper on **“Research on Intelligent Standardized English Test Systems with Artificial Intelligence”** has designed a test system combined with Artificial Intelligence for students examination activities. According to the author the results showed that the Intelligent standardized test system not only ensured the fairness of the examination, reduced the costs of the examination, but also assessed the capacity of the candidates more effectively.

The papers contribute to the domain progress elegantly.
