## **Editorial**

This issue has a few important papers that address research in web platforms. This includes the paper on architecture for web service for exchange and integration of data. The next paper deals with the Web 2.0 Integration in a WEB-Based Decision Support System.

A paper on model for Relevance Feedback in web based Collaborative Information Retrieval is presented interestingly in the third paper. Unit testing tools for software reliability is addressed in the fourth paper. The last paper is related with the design aspect of web based E-learning system. This paper besides the design, has addressed the implementation and evaluation of a Web-based Student Teachers' e-Portfolio.

We ensure the publication of innovative research in the issue and we continue to do more in the near-future.
