Editorial

We are pleased to release the third issue of this volume with significant papers as described below. In the first paper on "**Information Content Based Semantic Similarity Measure for Concepts Subsumed By Multiple Concepts**" the authors Ayesha Banu, Syeda Sameen Fatima and Khaleel Ur Rahman Khan analysed the information content measure to compute semantic similarity among information pieces.

Juwita Mohd Sultan, Garik Markarian and Phillip Benachour in their paper on "**Integration of WiFi and WiMAX Services: Bandwidth Optimization and Traffic Combination**" discussed through the use of OPNET simulation tools, number of WiFi users or hotspots could accommodated by a WiFi/WiMAX router and a WiMAX Base Station.

In the last paper on "**Real-time Environment Aware Web Service Selection and Evaluation**" the authors Feifei Wu, Jun Xu, Jiawei Lu, Gang Xiao and Yuanming Zhang proposed a service selection and evaluation method based on real-time environmental-aware.

The published papers in this issue mark value to the web research.
