We present the second as well as the last issue of the **Information Security Education Journal**. (ISEJ)

This issue is characterized by the following research. In the first paper on **“An improved node localization method for wireless sensor network based on evaluation of environment variables”** the authors *Qingjian Ni* and *Cen Cao* proposed a node localization method for Particle Swarm Optimization.

In the next paper on **“Security Countermeasures in Wireless Sensor Networks”** the authors *Arif SARI* and *Ersin CAGLAR* have addressed the security issues in the Wireless Sensor Networks and provided a comprehensive understanding on it.

Dongkai Xu in the last paper on **“Research on Design of Military Ideological and Political Education System Based on Internet security Education Community”** illustrated the connotation and principle of teaching design in the military ideological and political education courses for security.

We will come out with more research in the next issue of the next volume.
