Research

Bibliometrical Analysis on the Big Data Research in China- Yang Ruixian	383
The Modeling of Genetic and Tabu Search Algorithm Based BP Neural Network in the Risk Analysis of Investment- Liu Yang, Ding Yunlong	391
Segmentation Strategies for Passage Retrieval from Internet Video using Speech Transcripts- Christian Wartena	400
Study on Computer Audit Based on OLAP Technology- Tong Yanjun	409
Research on Digital Library Personalized Information Service Model Based on Agent Model- Xu Yan	418
Secure Digital Certificate Design Based on the RSA Algorithm- Yunsheng Zhong	423
Research on the Service Modeling Method of Information Management Software based on the Petri Net Model- Han Tianfeng	430
Differential Evolution for Rule Extraction and Its application in Recognizing Oil Reservoir- Jin-ling Li, Hai-xiang Guo, Ke-jun Zhu, De-yun Wang, Jing-lu Hu	435
Research on Transmission Based on Collaboration Coding in WSNs- LV Xiao-xing, ZHANG Bai-hai	441
Security Analysis and Evaluation of Random Linear Network coding under Wiretapping Attack- LV Xiaoxing, ZHANG Baihai	446
Robustness Analysis of Social Network based on a Dynamic Model- Haitao Wu, Shi Ying, Xiangyang Jia, Liqiang Zhang, Xu Chen	453
A Leakage Monitoring System of Pipeline in Heating Network- Yang Xianliang, Jia Lianlian, Wang Songling	462
Rotation Invariant Texture Image Retrieval Based on Log-Polar and NSCT- Bing Xu, Zhende Li, Shiyi Xie	470
A Novel RFID Authentication Protocol with Ownership Transfer- Dong Sun, Dan Liu	476
Research on an Adaptive Algorithm of Service Selection in Pervasive Computing- Liu Wei, Zhao Lanfei, Deng Jianqiang	482

Book Review	489
--------------------	-----

Conference Notification	490
--------------------------------	-----

- The Second International Conference on Future Generation Communication Technologies (FGCT 2012)

Editorial

This issue contains fourteen papers on varied themes in the large domain Information Science. Also this issue marks the last issue of the eleventh volume of the **Journal of Digital Information Management**. In the last eleven volumes, we continue to increase the size of the publication and papers and also expand the application issues. The last few issues in this volume have published many application papers that mark the significance of the need to publish research in applications aspects. Thus JDIM continues to make known the research in application aspects and it ensures the research world to publish more similar research in future.

Also we note that in the last couple of years we continue to receive large number of submissions from China. The Chinese papers have enhanced technical content and the research in the Information Science domain is increasing in China more voluminously. We are pleased to note the increasing popularity of JDIM in China. The acceptance rate of Chinese papers is more than the mean acceptance rate of JDIM. We appreciate and also recognize the research quantity and quality in China.
