(ICDCST 2015)
 - Tenth International Conference on Digital Information Management
(ICDIM 2015)

Editorial

In this last issue, we publish the following research.

The first paper addressed the hot area of research the Internet of Things (IoT). Authors have used the Microsoft have used to develop a flexible high performance CEP solution. In the second paper the authors have studied the **Electronic Commerce for Small and Medium Enterprises in West Sumatera**, a region in Indonesia. They claim that the model they proposed have provided Quality of System, Quality of Service, and Feature have a positive and significant influence toward the user' satisfaction of the e-commerce website model.

In the next paper the authors using system theory have studied the **Survival Mode of Intangible Cultural Heritage**. The model they proposed composed a survival system of intangible cultural heritage resources at a macro-angle, which includes cultural memory of nations and communities. They prove that the model when experimented found to be incremental. In the last paper the authors have discussed the virtual reality model based on mobile computing environment.

We will meet through the first issue in 2015 soon.
