

Fourth International Conference on Real-Time Intelligent Systems (RTIS 2019)
Zhuhai Chinese Academy of Sciences, China
November 01-03, 2019
www.socio.org.uk/rtis

Real-Time Computing covers a broad spectrum of the intensively developing area of low-latency priority-driven system responsiveness under certain time constraints to essential and decisive human-computer interactions with constantly incoming data stream. Research on real-time intelligent systems is of a multi-disciplinary nature, exploiting concepts from the areas as diverse as signal processing technologies, computational intelligence, location systems, data processing, digital document processing and embedded system design. To accomplish its real-time performance, systematic analysis is carried out when the systems are working.

Therefore, over the last few years real-time intelligent computing has radically transformed human life style. In the today's competitive and highly dynamic environment, analyzing data in real time is a must to understand in detail how the systems are processing the data and to reason the outputs and anticipate the trends in intelligent computing, has become critical.

To leverage the full potential of the opportunity build complex real time systems, intense research is required and this conference will serve as one such platform to manifest the ongoing research in the real time intelligence system.

The conference welcomes theoretically grounded, methodologically sound research papers from academia and industry that address variety of aspects and innovations related to real-time computing systems.

The scope of the conference includes, but is not limited to the following areas:

Streaming data, streaming engines
Big Data systems and applications for high-velocity data
Analysis in advanced domains such as energy, sensors, etc
Artificial Intelligence
Broadband Intelligence
Cloud Computing and Intelligence
Collaborative Intelligence
Crowdsourcing and crowd intelligence
Data capture in real-time
Intelligent Database Systems
Data mining
Intelligent Data Analysis
OLAP for real-time decision support
Data quality and cleansing
Intelligent Fuzzy Systems
Event-driven analytics
Visualizing real-time data and information
Intelligent Soft Computing
Privacy and security in Intelligence
Architectures for Intelligence

Internet of Things
 Intelligent Robotic Systems
 Smart Services and Platforms
 Intelligent Transportation Systems
 Mobile Smart Systems
 Trace-based intelligent real-time services (eye-tracking, image tracking)
 Real-time intelligent alert systems
 Machine translation in real time
 Multilingual information access
 Multiagent Intelligent Systems
 Intelligent Information Systems
 Adaptive vision algorithms
 Real-time Intelligent Network solutions
 Real-time distributed coding
 Real-time modelling user's information needs
 Real-time noise removal systems
 Real-time intelligent communication
 Real-time remote access systems
 Decision support systems in real time
 Real-time multiprocessor systems

The Proceedings will be published by Springer in the Proceedings of the 4th International Conference on Real-Time Intelligent Systems, Volume 3 RTIS 2019. (<http://www.springer.com/series/11156>)

Important Dates

Paper Submission:	August 15, 2019
Paper Notification:	September 15, 2019
Camera ready:	October 10, 2019
Early registration:	October 15, 2019
Full-rate registration:	October 22, 2019
Conference Dates:	November 01-03, 2019
