

## **Special issue on Smart Cities**

This special issue will publish the papers of the conference on Smart Cities

(<http://administratiepublica.eu/smartcitiesconference/2017/publicare.htm>)

The aim of the conference is to bring together researchers from different universities and industry from all over the world to discuss and present their research on smart city and related fields and their results. The conference welcomes submissions of original papers on all aspects of informatics and related fields ranging from new concepts and theoretical developments to advanced technologies and innovative applications. Paper acceptance and publication will be judged on the basis of their relevance to the conference topics, clarity of presentation, originality and accuracy of the results and proposed solutions.

### **TOPICS ADDRESSED**

Papers submitted to publication will primarily focus on the following aspects, but will not be limited only to these ones: e-government, e-democracy, social innovation, urban planning and development, legal sciences, political sciences, public management, urban sociology, technology. The list may also include studies on European integration, economics, environment, health, communication, architecture, cybernetics and many other domains.
