Editorial

We are pleased to bring the first issue of the publication of the Journal of E Technology.
This issue has the following research.

In the first paper on : “**Machine Translation Using Various Soft-Computing Tools**” the authors *Manish Rana* and *Mohammad Atique* have reviewed the various techniques and method people have discussed in the literature on machine translation.

In the next paper on “**An Approach for Integrating Kerberized non Web-Based Services with Web-Based Identity Federations**” the author Alexander Bersenev and his colleagues have proposed an approach for integrating non web-based applications with web-based identity federations using Kerberos protocol.

In the last paper on “**Reviewing Privacy Preserving Distributed Data Mining**” the authors *Sajjad Baghernezhad*, *Parisa Arjmand* have addressed the various data preserving methods together with the general methods such as random data, coding and strong and limitations.

Hope the published papers are interesting.
