Editorial

We present the third issue of the ninth volume of the Journal of Information & System Management with the below listed papers.

In the opening paper on “Research Publications Output among Academics in Pondicherry University: A bibliometric study” the authors Suresh, Hema, and Sankarasubramaniam took a long window to analyse the research productivity of a specific institution. They have analysed 2885 publications extensively by looking at various parameters. The results are posted with good amount of interpretation.

In the next paper on “Retrieval Efficiency of Search Engines on Medical Tourism in Kerala: A Webometric Analysis” the authors Thanuskodi and Naseehath have studied the retrieval efficiency of the various metasearch engines in terms of output and hits and found that Google has the third place, which is a contrast finding to several other previous study. This investigation hopes to rise some other issues for future analysis.

In the third paper on “International Journal of Information Science and Management: A Bibliometric Analysis” the authors Thavamani and Kanniyappan. presented a bibliometric techniques were used to analyze the authorship trend in contributions of “International Journal of Information Science and Management” for a period of 12 years. The analysed date include authorship and collaboration pattern.

In the last paper on “Literature Growth and Development of “E-learning: A Bibliometric Analysis using Bibexcel” the authors Thirumagal and Mani have studied the Bibexcel and Pajek tool. To analyse the publications in information and communication technology. The pieces of data analysed include author’s h-index, co-authorship pattern of cluster analysis, countries collaboration, and google map.

We will come up with more research in the next issue.
