

**Fourth International Conference on Real-Time Intelligent Systems (RTIS 2019)**  
**Zhuhai Chinese Academy of Sciences, China**  
**November 01-03, 2019**  
[www.socio.org.uk/rtis](http://www.socio.org.uk/rtis)

Real-Time Computing covers a broad spectrum of the intensively developing area of low-latency priority-driven system responsiveness under certain time constraints to essential and decisive human-computer interactions with constantly incoming data stream. Research on real-time intelligent systems is of a multi-disciplinary nature, exploiting concepts from the areas as diverse as signal processing technologies, computational intelligence, location systems, data processing, digital document processing and embedded system design. To accomplish its real-time performance, systematic analysis is carried out when the systems are working.

Therefore, over the last few years real-time intelligent computing has radically transformed human life style. In the today's competitive and highly dynamic environment, analyzing data in real time is a must to understand in detail how the systems are processing the data and to reason the outputs and anticipate the trends in intelligent computing, has become critical.

To leverage the full potential of the opportunity build complex real time systems, intense research is required and this conference will serve as one such platform to manifest the ongoing research in the real time intelligence system.

The conference welcomes theoretically grounded, methodologically sound research papers from academia and industry that address variety of aspects and innovations related to real-time computing systems.

The scope of the conference includes, but is not limited to the following areas:

- Streaming data, streaming engines
- Big Data systems and applications for high-velocity data
- Analysis in advanced domains such as energy, sensors, etc
- Artificial Intelligence
- Broadband Intelligence
- Cloud Computing and Intelligence
- Collaborative Intelligence
- Crowdsourcing and crowd intelligence
- Data capture in real-time
- Intelligent Database Systems
- Data mining
- Intelligent Data Analysis
- OLAP for real-time decision support
- Data quality and cleansing
- Intelligent Fuzzy Systems
- Event-driven analytics
- Visualizing real-time data and information
- Intelligent Soft Computing
- Privacy and security in Intelligence
- Architectures for Intelligence

Internet of Things  
Intelligent Robotic Systems  
Smart Services and Platforms  
Intelligent Transportation Systems  
Mobile Smart Systems  
Trace-based intelligent real-time services (eye-tracking, image tracking)  
Real-time intelligent alert systems  
Machine translation in real time  
Multilingual information access  
Multiagent Intelligent Systems  
Intelligent Information Systems  
Adaptive vision algorithms  
Real-time Intelligent Network solutions  
Real-time distributed coding  
Real-time modelling user's information needs  
Real-time noise removal systems  
Real-time intelligent communication  
Real-time remote access systems  
Decision support systems in real time  
Real-time multiprocessor systems

The Proceedings will be published by Springer in the Proceedings of the 4th International Conference on Real-Time Intelligent Systems, Volume 3 RTIS 2019. (<http://www.springer.com/series/11156> )

### **Important Dates**

Paper Submission:	August 15, 2019
Paper Notification:	September 15, 2019
Camera ready:	October 10, 2019
Early registration:	October 15, 2019
Full-rate registration:	October 22, 2019
Conference Dates:	November 01-03, 2019
