Call for Papers

Digital Information technologies are gaining maturity and rapid momentum in adoption across disciplines. The digital community is producing new ways of using digital information technologies for integrating and making sense out of various data ranging from real/live streams and simulations to analytics data analysis, in support of mining of knowledge. The conference will feature original research and industrial papers on the theory, design, and implementation of digital information systems, as well as demonstrations, tutorials, workshops and industrial presentations.

The topics in ICDIM 2018 include but are not confined to the following areas.

- Information Retrieval
- Data Grids, Data and Information Quality
- Big Data Management
- Temporal and Spatial Databases
- Data Warehouses and Data Mining
- Web Mining including Web Intelligence and Web 3.0
- E-Learning, eCommerce, e-Business and e-Government
- Natural Language Processing
- XML and other extensible languages
- Web Metrics and its applications
- Enterprise Computing
- Semantic Web, Ontologies and Rules
- Human-Computer Interaction
- Artificial Intelligence and Decision Support Systems
- Knowledge Management
- Ubiquitous Systems
- Peer to Peer Data Management
- Interoperability
- Mobile Data Management
- Data Models for Production Systems and Services
- Data Exchange issues and Supply Chain
- Data Life Cycle in Products and Processes
• Case Studies on Data Management, Monitoring and Analysis
• Security and Access Control
• Information Content Security
• Mobile, Ad Hoc and Sensor Network Security
• Distributed information systems
• Information visualization
• Web services
• Quality of Service Issues
• Multimedia and Interactive Multimedia
• Image Analysis and Image Processing
• Video Search and Video Mining
• Cloud Computing
• Intelligence Systems
• Artificial Intelligence Applications

**Proceedings**

- All the accepted papers will appear in the proceedings published by IEEE.
- All papers will be fully indexed by IEEE Xplore.
- All the ICDIM papers are indexed by DBLP.

**Modified version of the selected papers will appear in the special issues of the following peer reviewed journals.**

1. Journal on Data Semantics
2. Technologies
3. Data Technologies and Applications
4. Webology
5. Journal of Digital Information Management
7. Journal of Optimization

Program Committees

General Chair

Stefan Covaci, Technische University at Berlin, Germany
Thomas Jell, Siemens, Germany

Program Chairs

Pit Pichappan, Digital Information Research Labs, India & UK
Simon Fong, University of Macau, Macau
Yao-Liang Chung, National Taiwan Ocean University, Taiwan

Co-Chairs

Manabu Ohta, Okayama University, Japan
Robert Bierwolf, IEEE TEMS, Netherlands
Feliz Lustenberger, Espros Photonics Corporation, Switzerland

Workshop Chair

Adrian Florea, University Lucian Blaga of Sibu, Romania

Call for Papers

Real-Time Computing covers a broad spectrum of the intensively developing area of low-latency priority-driven system responsiveness under certain time constrains to essential and decisive human-computer interactions with constantly incoming data stream. Research on real-time intelligent systems is of a multi-disciplinary nature, exploiting concepts from the areas as diverse as signal processing technologies, computational intelligence, location systems, data processing, digital document processing and embedded system design. To accomplish its real-time performance, systematic analysis is carried out when the systems are working.

Therefore, over the last few years real-time intelligent computing has radically transformed human life style. In the today’s competitive and highly dynamic environment, analyzing data in real time is a must to understand in detail how the systems are processing the data and to reason the outputs and anticipate the trends in intelligent computing, has become critical. To leverage the full potential of the opportunity build complex real time systems, intense research is required and this conference will serve as one such platform to manifest the ongoing research in the real time intelligence system.

The conference welcomes theoretically grounded, methodologically sound research papers from academia and industry that address variety of aspects and innovations related to real-time computing systems.

The scope of the conference includes, but is not limited to the following areas:

• Streaming data, streaming engines
• Big Data systems and applications for high-velocity data
• Analysis in advanced domains such as energy, sensors, etc
• Artificial Intelligence
• Broadband Intelligence
• Cloud Computing and Intelligence
• Collaborative Intelligence
• Crowdsourcing and crowd intelligence
• Data capture in real-time
• Intelligent Database Systems
• Data mining
• Intelligent Data Analysis
• OLAP for real-time decision support
• Data quality and cleansing
• Intelligent Fuzzy Systems
• Event-driven analytics
• Visualizing real-time data and information
• Intelligent Soft Computing
• Privacy and security in Intelligence
• Architectures for Intelligence
• Internet of Things
• Intelligent Robotic Systems
• Smart Services and Platforms
• Intelligent Transportation Systems
• Mobile Smart Systems
• Trace-based intelligent real-time services (eye-tracking, image tracking)
• Real-time intelligent alert systems
• Machine translation in real time
• Multilingual information access
• Multiagent Intelligent Systems
• Intelligent Information Systems
• Adaptive vision algorithms
• Real-time Intelligent Network solutions
• Real-time distributed coding
• Real-time modelling user’s information needs
• Real-time noise removal systems
• Real-time intelligent communication
• Real-time remote access systems
• Decision support systems in real time
• Real-time multiprocessor systems

Important Dates

Paper Submission : September 10, 2018
Paper Notification : September 20, 2018
Camera ready : October 10, 2018
Early registration : November 01, 2018
Full-rate registration : November 10, 2018
Conference Dates : November 13-15, 2018

Program Committees

Honorary General Chair
Jolanta Mizera-Pietraszko, Opole University, Poland

General Chair
Yao-Liang Chung, National Taiwan Ocean University, Taiwan

Program Chairs
Pit Pichappan, Digital Information Research Lab., India
Simon Fong, University of Macau, Macau
Wen-Jer Chang, National Taiwan Ocean University, Taiwan
Program Co-Chairs

Hung-Yuan Chung, National Central University, Taiwan
Cheung-Chieh Ku, National Taiwan Ocean University, Taiwan
Carsten Maple, University of Bedfordshire, UK

Workshop Chair

Ricardo, Rodriguez
Technological University of Ciudad Juarez, Mexico

Journal Track Chair

Schahram Dustdar
TU Wien, Austria

Mentorship Program Chair

Ronald R, Yager
Machine Intelligence Institute, Iona College, USA

Organizing Committee

Yao-Liang Chung, National Taiwan Ocean University, Taiwan

International Program Committee

• Francisco Herrera University of Granada, Spain
• Kay Chen TAN National University of Singapore, Singapore
• Yi Pan Georgia State University, United States
• Edward Szczerbicki University of Newcastle, Australia
• Tommaso Melodia Northeastern University, United States
• Simon Fong University of Macau, Macau
• Kuan-Ching Li Providence University, Taiwan
• Masaki Murakami Okayama University, Japan
• Pascal Lorenz University of Haute Alsace, France
• Sarantos Kapidakis Ionian University, Greece
• Erich Schikuta University of Vienna, Austria
• Jonathan Loo Middlesex University, UK
• William Grosky University of Michigan, United States
• Behzad Bordbar University of Birmingham, UK
• Bent G. Christensen Cisco Systems, Inc. USA
• Maytham Safar Kuwait University, Kuwait
• Adam Grzech Wroclaw University of Technology, Poland
• Tanuja Srivastava Indian Institute of Technology, Roorkee, India
• Radu-Emil Precup Politehnic University of Timisoara, Romania
• Janusz Kacprzyk Polish Academy of Sciences, Poland
• Schahram Dustdar TU Wien, Austria
• Ronald R, Yager Machine Intelligence Institute, Iona College, USA
