Editorial

We present this last issue of this volume with the following papers.

In the first paper on "**Compass-Complex Event Processing Enabled By State Space Transformations"**the author *Deepak Gangadhar*has discussed the information processing activities for various events. The author has classified two types of events, viz., macro-level states by making use of the micro-level events.

Muhammad Ijaz in his second paper on "**Use of Formal Methods in SE (Software Engineering) with Examples"** has discussed theformal methods for software engineering. He has detailed the important formal methods, techniques and their importance with examples.

The authors *Orlando Belo, Rui Barros*and *Paulo Rodrigues* in their last paper on "**A Personalization System for Data Visualization Platforms"** havedesigned and implemented a personalization system for data visualizationplatforms.

We will come out with more research in the next volume.
