<http://www.dline.info>

## **2020 Prices for Third World Countries**

**DLINE- The Information Gateway to Science and Technology Innovation.**

**Published by the DLINE INC, USA, UK, Hong Kong and India.**

**Internationally Reviewed and Indexed Journals.**

**DLINE Journals serve as the gateway to the Scientific and technical knowledge. DLINE journals undergo rigorous peer-review process and ensure originality in content and contribution. DLINE publishes eminent and reviewed journals in Science, Engineering, Technology and Management.**

## **Features of DLINE Journals**

- **DLINE offers access to PDF Full-Text Articles from Current Content and All Online Back Files Published Since 2003.**
- **DLINE offers access to Online Early Articles, i.e., Peer-Reviewed Articles published online before the Print Issue is completed.**
- **Archival Access to Paid-For Content, Where DLINE has the Rights to Deliver IP and/or Remote User Access/Password Authentication.**
- **DLINE is a member of CROSSREF.**
- **DLINE offers the Usage Statistics.**
- **DLINE searching mechanism is more functional where it offers full text papers which are searchable for Author, Title, Keywords, Journal Name and Year/Period.**
- **In 2019 DLINE Publishes 21 Reviewed Journals in Print as well as Online.**

## Journal of Digital Information Management

The Journal of Digital Information Management (JDIM), a bimonthly Journal of Digital Information Science and Technology, has been published since March 2003. Sponsored by the Digital Information Research Foundation, it concentrates on all aspects of Digital Information Management, and covers digital information processing, Digital content management, Digital world structuring, Digital libraries, Metadata, Information management and other related fields. An international peer-reviewed Journal, JDIM contains original research papers, ongoing research, technology reviews, reports on work-in-progress, short notes and announcements of forthcoming events. It acts as a portal to the digital information world.

## Journal of Multimedia Processing and Technologies

The Journal of Multimedia Processing and Technologies(JMPT) aims to provide a multidisciplinary forum to present and discuss theory and research, development, architectures, networking, system support tools and applications as well as case studies of multimedia and hypermedia. It also features experimental and survey articles. It seeks to fill the gap that exists between several fields and communities such as image processing, video processing, audio analysis, information retrieval and understanding, data management and mining, security, and education. The journal is intended for academic researchers, practitioners, industry professionals, consultants, managers, students, educators, policy makers and engineers working in the field and/or are involved in multimedia system research, design and applications.

## Journal of Information Organization

Organizing information is a bottom-line issue in establishing frameworks for thought used in research and teaching across scholarly disciplines. The applications require well-thought-out conceptual structures which must be developed by beginning from scratch or by refining existing knowledge organization and information processing systems. There is a good scope for working on the issues such as interoperability, interface, ontologies, taxonomies, solving complexities and so on.

## Journal of Electronic Systems

The electronic systems are expected to have a significant impact on the lives of people in the coming years. The Electronic technologies require specific power electronics capabilities to convert the power generated into useful power that can be directly interconnected with the utility grid and/or can be used for consumer applications. The mission of the Journal of Electronic Systems is to publish high scholarly research in electronic systems from them across scope through the microscopic levels.

## Progress in Computing Applications

Progress in Computing Applications (PCA) concentrates on applications rather than the presentation of theoretical aspects such as concepts, architectures and algorithms. The journal will publish all aspects of computing papers other than the theory and other related papers. In the wider sense, we are interested in investigating several aspects of the computing engineering process that remain poorly understood in relation to other domains. We believe that challenges related to testing, in particular, will need to be addressed further before the applications become live.

## Transactions on Machine Design

The Transactions on Machine Design publishes research papers on design aspects of many disciplines in Engineering and Technology. These include electrical, electronics, computing, mechanical and technology areas. It includes both basic machines and machines in applied sciences and technology such as medical, instrumentation, astronomy, aeronautics and so on.

It publishes original and scholarly papers after rigorous peer reviewing. The TMD publishes research papers, reports, reviews and book reviews.
