

# 2023 DLINE JOURNALS CATALOGUE

**Internationally  
Reviewed  
and  
Indexed Journals**

**Published by  
the DLINE INC,  
USA, UK,  
Hong Kong**

## Features of DLINE Journals

**DLINE Journals in Science, Engineering,  
Technology and Management**

- ✓ DLINE offers access to PDF Full-Text articles from Current Content and All Online Back Files Published Since 2003.
- ✓ DLINE offers access to Online Early Articles, i.e., Peer-Reviewed Articles published online before the Print Issue is completed.
- ✓ Archival Access to Paid-For Content, Where DLINE has the Rights to Deliver IP and/or Remote User
- ✓ Remote IP based Access/Password Authentication.
- ✓ DLINE offers the Usage Statistics.
- ✓ DLINE searching mechanism is more functional where it offers full text papers which are searchable for Author, Title, Keywords, Journal Name and Year/Period.
- ✓ DLINE- The Information Gateway to Science and Technology Innovation.
- ✓ DLINE is a member of CROSSREF
- ✓ DLINE Journals serve as the gateway to the Scientific and technical knowledge. DLINE journals undergo rigorous peer-review process and ensure originality in content and contribution. DLINE publishes eminent and reviewed journals in Science, Engineering, Technology and Management.
- ✓ In 2023 DLINE Publishes 23 Reviewed Journals in Print as well as Online.

### Indian Office

DLINE Inc.,  
New # 11, Ramanujam Street, T.  
Nagar, Chennai - 600 017. India.  
subscription@dirf.org|  
director@dline.info

### Corporate Head Office

DLINE Inc., Digital Information  
Research Ltd  
190, Wards Road, Ilford, IG2 7DY.  
London, UK subscription@dline.info|  
director@dline.info

### Hong Kong Office

Asian Journals Ltd  
8/F Kongling Bldg. 100 Jervois  
Street, Sheung Wan Central District,

## Journal of Digital Information Management

The Journal of Digital Information Management (JDIM), a bimonthly Journal of Digital Information Science and Technology, has been published since March 2003. Sponsored by the Digital Information Research Foundation, it concentrates on all aspects of Digital Information Management, and covers digital information processing, Digital content management, Digital world structuring, Digital libraries, Metadata, Information management and other related fields. An international peer-reviewed Journal, JDIM contains original research papers, ongoing research, technology reviews, reports on work-in-progress, short notes and announcements of forthcoming events. It acts as a portal to the digital information world.

### Editor-in-chief

Daisy Jacobs, University of Zululand, South Africa  
Stephanne Bressanne, National University of Singapore  
Adrian FLOREA, Lucian Blaga' University of Sibiu, Romania  
Pit. Pichappan, Society for Information Organization, India

### Journal of Digital Information Management (JDIM)

<http://www.dline.info/jdim/>

ISSN: 0972 7272

Volume 21 (4 issues)

Format- Print, Online & DVD

Online Back files 2003-2022

## International Journal of Web Applications

In the last few years there is a growing demand for different web applications. As the demand for applications increase, research is now focused on many directions; to leverage new architectures, improve scalability, developing new frameworks, introducing new development platforms, building multi-tier applications, enhance scripting languages, improving filters, introducing security platforms and so on. In the web applications we experience many generations. While the first level generation was primitive with little scope and features, the subsequent generations look at improving technology, functions and features in the web world. Realizing the need to document the current research in the Web applications, this international journal has been initiated. The "International Journal of Web Applications" (IJWA) intends to be a high quality referred journal. The IJWA invites original contributions in the areas listed below. The IJWA publishes research papers, technical reports, book reviews and notifications. Each submission undergoes extensive review.

### Editor-in-chief

Simon Berkovich, George Washington University, USA  
Ching-Hsien (Robert) Hsu, Chung Hua University, Taiwan  
Daisy Jacobs, University of Zululand, South Africa

### International Journal of Web Applications (IJWA)

Print ISSN: 0974-7710

Online ISSN: 0974-7729

2023 Publication Frequency

Volume 15 (4 issues)

Format-Print, Online & DVD

Online Back files 2009-2022

## Journal of E-Technology

*Journal of E-Technology* is a scholarly journal in E-technology and its applications. It publishes original and scholarly papers after rigorous peer reviewing. The JET publishes research papers, reports, reviews and book reviews.

### Editor-in-chief

Adrian FLOREA, University "Lucian Blaga" of Sibiu  
Saravanan Muthaiah, Multimedia University, Malaysia

### Journal of E-Technology (JET)

<http://www.dline.info/jet>

Print ISSN: 0976-3503

Online ISSN: 0976-2930

2023 Publication Frequency

Volume 14 (4 issues)

Format- Print, Online & DVD

Online Back files 2010-2022

## Journal of Networking Technology

In the modern high performance computing systems, innovative as well as hi-tech research is required to address the challenges in the networking. The Journal of Networking Technology will act as a platform to publish and disseminate the cross-cutting research in networking systems.

### Editor-in-chief

Khalil Challita, Notre Dame University  
Ali Amiri, Iran University of Science and Technology, Iran  
Daisy Jacobs, University of Pretoria, South Africa  
Estevam Rafael Hruschka, Carnegie Mellon University, USA  
Veli Hakkoymaz, Fatih University, Turkey  
Jan Platos, Technical University of Ostrav, Czech Republic  
Weimin He, University of Wisconsin-Stevens Point, USA  
Mohd Nazri Ismail, University of Kuala Lumpur, Malaysia

### Journal of Networking Technology (JNT)

<http://www.dline.info/jnt>

Print ISSN: 0976-898X

Online ISSN: 0976-8998

2023 Publication Frequency

Volume 14 (4 issues)

Format-Print, Online & DVD

Online Back files 2010-2022

## Journal of Intelligent Computing

The aim of this international journal is to provide a platform for original and significant contributions in the field of Intelligent Computing in its wide scope. Intelligent Computing is taken here to include theory, algorithms, applications and technologies. This journal is a forum for scientists, engineers, and practitioners to present their latest research results, ideas, developments and applications in Information retrieval on the web, Information Sciences, Artificial Intelligence, Mobile Computing, Networking, Web Content Mining, Health Informatics, Bioinformatics and IT Applications across disciplines.

### Editor-in-chief

Aladdin Ayeshe, De Montford University, UK

### Journal of Intelligent Computing (JIC)

<http://www.dline.info/jic>

Print ISSN: 0976-9005

Online ISSN: 0976-9013

2023 Publication Frequency

Volume 14 (4 issues)

Format- Print, Online & DVD

Online Back files - 2010-2022

## Journal of Multimedia Processing and Technologies

The Journal of Multimedia Processing and Technologies (JMPT) aims to provide a multidisciplinary forum to present and discuss theory and research, development, architectures, networking, system support tools and applications as well as case studies of multimedia and hypermedia. It also features experimental and survey articles. It seeks to fill the gap that exists between several fields and communities such as image processing, video processing, audio analysis, information retrieval and understanding, data management and mining, security, and education. The journal is intended for academic researchers, practitioners, industry professionals, consultants, managers, students, educators, policy makers and engineers working in the field and/or are involved in multimedia system research, design and applications.

### Editor-in-chief

Hathairat Ketmaneechairat, Thailand

### Journal of Multimedia Processing and Technologies (JMPT)

## Journal of Information Technology Review

Journal of Information Technology Review is a scholarly journal in Information Technology and its applications. It publishes original and scholarly papers after rigorous peer reviewing. The R & D have been transforming the Computing paradigms and technology in multidimensional directions. Research in Information Technology is distributed, heterogeneous, and multidisciplinary. The Journal of Information Technology Review characterizes the innovative IT, by addressing the significant areas and themes in Information Technology.

### Editor-in-chief

Juan Jose PRIETO-GUTIERREZ, Universidad Complutense de Madrid, Espana. Ali Amiri, ran University of Science and Technology, Iran. Fabio Okuyama, IFRS, Brazil. Fernando Luiz Koch, The University of Melbourne, Australia. Gabriel Villarrubia González, Universidad de Salamanca, Spain. Joao Balsa da Silva, Universidade de Lisboa, Portugal. João Luís Tavares Silva, Brazil. Marilton Sanchotene de Aguiar, Universidade de Pelotas, Brazil. Ricardo Azambuja Silveira, Universidade Federal de Santa Catarina, Brazil. Amir Masoud Rahmani, Islamic Azad University, Iran

Online Back files - 2010-2022

## Journal of Information Security Research

Journal of Information Security Research (JISR) is a scholarly journal in Information Security at a broad level. The JISR addresses the core research in Information Security. It publishes original and scholarly papers after rigorous peer reviewing. The JISR publishes research papers, reports, reviews and book reviews.

### Editor-in-chief

Victor Ralevich, Sheridan Institute of Technology and Advanced Learning, Ontario, Canada

Dragana Martinovic, University of Windsor, Windsor, ON, Canada

Milan Milosavljevic, Singidunum University, Belgrade, Serbia

Akshai Aggarwal, University of Windsor, Windsor, ON, Canada

Milan Petkovic, Philips Research Laboratories, Eindhoven, The Netherlands

Anton Chuvakin, Security Warrior Consulting, Principal, US

Lina Zhou, University of Maryland, Baltimore County, Baltimore, Maryland, US

Murray Rosenthal, Toronto, ON, Canada

Format- Print, Online- DVD

Online Back files - 2010-2022

## International Journal of Computational Linguistics Research

*International Journal of Computational Linguistics Research* is a scholarly journal in Computational linguistics and text mining including natural language processing. It publishes original and scholarly papers after rigorous peer reviewing. The IJCLR publishes research papers, reports, reviews and book reviews.

### Editor-in-chief

Shihadeh Alqrainy, Albalqa Applied University, Jordan. Rafal Rzepka, Hokkaido University, Japan. Kapetanios Epaminondas, University of Westminster, UK. Vassiliadis Panos, University of Ioannina, Greece. Amr Ahmed, University of Lincoln, UK. Zygmunt Vetulani, Adam Mickiewicz University, Poznan, Poland. Eric Atwell, University of Leeds, UK. Sabah Al-Batrokh, King Khalid University, KSA. Xu Feiyu, DFKI Saarbrücken, Germany. Hasan Rashaydeh, Albalqa Applied University, Jordan. Abdelbadee Salem, Ain Shams University, Egypt. Rafal Rzepka, Hokkaido University, Japan. Kenji Araki, Hokkaido University, Japan. Riyadh Al-Shalabi, Arab Academy for Banking & Financial Sciences, Jordan. Fouzi Harrag, Farhat Abbas University, Algeria. Jianfeng Gao, Microsoft Research, USA. Kamal Bechkoum, The University of Northampton, UK. Sara Candeias, Instituto de Telecomunicacoes, Portugal. Hong Cui, University of Arizona, USA.

## International Journal of Information Studies

The International Journal of Information Studies seeks the advancement of the knowledge in the expanding field of information studies. Our mission is to attract the highest quality theoretical and applied research in the field of information studies, including information science, management, retrieval, analysis, systems, theory, applications, and policy, as well as in the field of human-computer interaction. The International Journal of Information Studies is a scholarly journal dedicated to reflect the interdisciplinary and dynamic field of information studies. Our aim is to promote the exchange of information and knowledge among researchers around the globe in general, and among Arabic- English speaking scientists, practitioners, and educators in particular. The International Journal of Information Studies is a bilingual peer-reviewed publication. We welcome articles in both English and Arabic. Abstracts will be provided in both languages. We believe a commitment to top-quality research in both languages will increase and enrich the reach and impact of the journal.

### Editor-in-chief

Sulaiman Alreyaee, Al Imam University, Riyadh, Saudi Arabia  
Dion Goh, School of Communication and Information Nanyang Technological University, Singapore

## International Journal of Information Studies (IJIS)

## Journal of Data Processing

The production of mass of heterogeneous data has created multiple issues and challenges. Researchers based on intuition as well as empirical evidence are distilling an alarming array of information into a corpus of manageable core concepts. The requirement is to use the theoretical and practical approaches as vehicles to introduce a broad variety of solutions and applications with a high precision. The Journal of Data Processing is planned to publish systems for data processing that are scalable to support a variety of algorithms and to function so that additional incorporation of informatics modules does not interrupt production systems.

### Editor-in-chief

Adrian Florea, University "Lucian Blaga" of Sibiu, Romania  
Antonio J. Tallón-Ballesteros, University of Seville, Spain  
Daisy Jacobs, University of Pretoria, South Africa  
Estevam Rafael Hruschka, Carnegie Mellon University, USA

Volume 13 (4 issues)

Format-Print, Online & DVD

Online Back files - 2011 - 2022

## Digital Signal Processing and Artificial Intelligence for Automatic Learning

AL usually plays an important role in the transition from data storage to decision support systems based on very large databases of signals such as the data obtained from sensor networks, internet services, or communication systems. These systems stimulate development of both computational solutions and novel models. Signals from real world systems such as speech, music, bio-medical, multimedia, among others, are usually quite complex making digital signal processing very useful to automate analytic operations in order to retrieve information from the data storage. Topics will range from foundations for real-world systems, and speech processing to language analysis, biomedicine, convergence and complexity analysis, machine learning, social networks, sparse representations, visual analytics, robust statistical methods.

### Editor-in-chief

Dr. Ricardo Rodriguez-Jorge, Autonomous University of Ciudad Juarez, Mexico

## Digital Signal Processing and Artificial Intelligence for Automatic Learning

## Journal of Electronic Systems

The electronic systems are expected to have a significant impact on the lives of people in the coming years. Electronic technologies require specific power electronics capabilities to convert the power generated into useful power that can be directly interconnected with the utility grid and/or can be used for consumer applications. The mission of the Journal of Electronic Systems is to publish high scholarly research in electronic systems from the macroscope through the microscopic levels. The themes include power systems monitoring and operation; automatic control; power electronics; high-voltage engineering; and conventional, operation; automatic control; power electronics; high-voltage engineering; and conventional, continuum, and biological electro- mechanics digital control systems, electronic payment system, electronic ignition system, and digital communication systems. The JES will publish high level technical as well as original and significant contributions relating to the theory, architecture modeling, design, performance and reliability of electronic and integrated circuit devices and interconnects, involving insulators, metals, organic materials, micro-plasmas, semiconductors, quantum- effect structures, vacuum devices, and emerging materials with applications in bioelectronics, biomedical electronics, computation, communications, displays, micro-electro mechanics, imaging, micro-actuators, nanotechnology, optoelectronics, photovoltaics, power ICs and micro-sensors. The themes integrate the sources, channels and means involving all types of terminals, computers and information processors.

### Editor-in-chief

Francis Li, University of Salford, UK  
Laurence Rodrigues do Amaral, UFG Jatai, GO – Brazil

## Journal of Electronic Systems (JES)

<http://www.dline.info/jes>

## Electronic Devices

Electronic Devices is a comprehensive primary medium of disseminating research in electronic devices and related fields for a wide range of multidisciplinary audiences. The goal of this scholarly journal is to give an update of state-of-the art in this interdisciplinary field, while focusing on new trends in electronic device research.

### Editor-in-chief

Kiranyaz Mustafa Serkan, Tampere University of Technology, Finland  
Antonio J. Tallón-Ballesteros, University of Seville, Spain

## Electronic Devices (ED)

Volume 12 (2 issues)

Format- Print, Online & DVD

Online Back files - From 2012

## Progress in Computing Applications

Progress in Computing Applications (PCA) concentrates on applications rather than the presentation of theoretical aspects such as concepts, architectures and algorithms. The journal will publish all aspects of computing papers other than the theory and other related papers. In the wider sense, we are interested in investigating several aspects of the computing engineering process that remain poorly understood in relation to other domains. We believe that challenges related to testing, in particular, will need to be addressed further before the applications become live.

### Editor-in-chief

Hebah H. O. Nasereddin, Middle East University for Graduate Studies, Jordan

## Transactions on Machine Design

The Transactions on Machine Design publishes research papers on design aspects of many disciplines in Engineering and Technology. These include electrical, electronics, computing, mechanical and technology areas. It includes both basic machines and machines in applied sciences and technology such as medical, instrumentation, astronomy, aeronautics and so on.

It publishes original and scholarly papers after rigorous peer reviewing. The TMD publishes research papers, reports, reviews and book reviews.

### Editor-in-chief

## Information Security Education Journal

ISEJ seeks to collect and publish high-quality research, perspective, and best practice articles on the instructional challenges and innovations associated with Information Security teaching and learning in post-secondary educational settings. Information Security education includes curriculum development and implementation, best practices in the teaching of information security theoretical and practical topics, InfoSec laboratory experiences and exercises, and other related pedagogical topics.

It publishes original and scholarly papers after rigorous peer reviewing. The ISEJ publishes research papers, reports, reviews and book reviews.

## Journal of Science and Technology Metrics

Science and Technology Research Evaluation is increasingly a mandatory requirement in the research management systems across countries. Newer indicators are produced and tested to improve the reliability of evaluation. Still, a perfectly acceptable solution in the 'research-evaluation' system is elusive. Assessment transcripts generate both linear as well as skewed models reflecting inconsistencies. Approaches and techniques to identify the objectivity to derive significant insights are thus essential in the science and technology research assessment.

The Journal of Science and Technology Metrics is concerned with how the use of many metrics may involve the assessment of different aspects of science and technology which is best expressed using different approaches. The journal is expected to provide a platform for presenting novel ideas and discussing their application of metrics in Science and Technology System.

### Editor-in-chief:

Pit Pichappan, Digital Information Research Labs., India

## Journal of Information Organization

Organizing information is a bottom-line issue for establishing frameworks for thought used in research and teaching across scholarly disciplines. It assists in the formation of useful concepts and it serves to assist in many emerging paradigms. Information organization is highly significant for the end-users to gain understanding of knowledge processing and information. It has more applications in computer programs where people process information to arrive at definite conclusions and gain inferences. There is a body of good applications such as biological data processing, medical expert systems, E-learning, E-commerce and semantic Web.

These applications require well-thought-out conceptual structures which must be developed by beginning from scratch or by refining existing knowledge organization and information processing systems. There is a good scope for working on the issues such as interoperability, interface, ontologies, taxonomies, solving complexities and so on.

All papers are peer reviewed by a minimum of two reviewers.

### Editor-in-chief
