

Editorial

We are pleased to release the last issue of the **International Journal of Information Studies** with the below listed papers.

In the first paper on “**E-Resources: A Reservoir for Information Seekers**” authors *Kalaiappan* and *Saravanan* have identified the significance of digital resources in the medical field and by taking four target institutions under AYUSH as study. The study found that the e-resources become an integral part of regular academic activity and ease the information seekers to get the required information anywhere at any point of time.

In the next paper on “**Open Source Software (OSS) for Creation of Digital Library Repositories**” the authors *Madhu*, *Lakshana kumar* and *Senthilnayagam* studied various available open source software for digital repositories. This paper has identified many available open source software. They have indicated the advantages of Open Source Software, desirable features of DL Software and Digital repository created by OSS in India.

In the third paper on “**Procedure Writing Methods in Library with Reference to ISO Standards 9001: 2008**” the authors *Maidhili* and *Meenambika* have provided a brief introduction about the steps of ISO implementation procedure writing on the different works of the library and to determine the performance of the services of the engineering college libraries. They concluded that the ISO implementation lends more responsibility to each and every person and brings best hierarchical structure and work flow in any organization.

In the last paper on “**Assessment of Information Literacy Skills Among the Masters Students of Social Sciences of Mizoram University and Tezpur University in India**” the authors *Ravi Shukla* and *Manoj Kumar Verma* have studied the information literacy skills of the Masters students of the Mizoram and Tezpur Universities in India using a qualitative semi-structured questionnaire and the results are widely discussed in the paper.

The papers of this issue provide a very comprehensive approach to digital libraries and digital resources.
