Editorial

We are bringing the eleventh volume of the *International Journal of Web Applications* with the below described research.

This issue is characterized by the below listed papers. In the first paper on “Zakat Management System: Designing Effective Approach Through Knowledge Management System” the author Muharman Lubis has presented the encounter social problem such as poverty in society by sharing the percentage of wealth to relevant recipients as the obligation to the person who affordable. The author tried to discover the conventional approach within zakat staff’s institution and at the same time provide the other suggestion especially in KM in order to improve their task by the fastest and the smartest way.

In the last paper on "E-Government Readiness Model Development for Successful ICT Adoption at Government Institution in Indonesia", the authors Soni Fajar, Gumilang, Heru Nugroho, Muharman Lubis and Deden Jacob proposed a model for ICT adoption in term of assessing the e-Government Readiness by using 7 enterprise enablers of COBIT 5, which is performed to a case study in the provincial government, focused in the Bandung districts. The author believes that this model will support the provincial government of Bandung to assess the ICT adoption, even understand the factor related to the process.

In the last paper on “Aiding the Task of Process-Based Modeling with ProBMoTViz” the authors Gjorgi Peev, Nikola Simidijevski and Sašo Dzeroski designed and implemented an extension of ProBMoT, named ProBMoTViz, which is a platform consisting of a GUI (Graphical User Interface) for ProBMoT and a PBM Visualizer for process based models. The main purpose of this model is to overcome the limitations of ProBMoT. Finally they have evaluated the versatility of ProBMoTViz on example case studies.

Hope the papers in this issue mark elegance and novelty in research.
