November 11-13, 2021
www.socio.org.uk/ddp

Digital data technologies gain growth in the last two decades and have widespread applications. In the information world, humans and machine agents are dependent on good quality data to be capable to infer and learn from it through a process of knowledge engineering. Users leverage opportunities to implement interventions that could facilitate optimal access to reputable scientific data, thereby fostering the knowledge process by making data findable and available to information agents. Many professionals and end-users need to continuously develop their data skills to enable themselves to be smarter in the use, process, visualize and apply data.

The First International Conference on Digital Data Processing was held during November 15-16, 2019 at the University of Bedfordshire, Luton in UK. The second event will be held at Tangier in Morocco during November 11-13, 2021
