

Editorial

We bring the third issue of the **Journal of Information Organization** with the below listed papers.

In the first paper on “**A Bibliometric Study on Social Science Research in Sri Lanka for Fifteen Years**” the author *Asoka Siriwardana* used the Social Science Citation Index (SSCI) database between 2003 to 2017, study the research performance in the Sri Lanka. The analysis and evaluation of the distribution of publications and citations, for the numerical characterization of research performance in Sri Lanka has been made in this work.

In the second paper on “**Changing Scenario of Library Facilities and Services to Disabled Users in Law Institutions: A Study**” the author *Bagavathi* explored the use of library resources and the facilities by the disabled users in a selected library and its affiliated institution libraries and to discover whether the selected library and its affiliated institutions are satisfying the various requirements of disabled users in the digital era.

In the last paper on “**Identification of Scientific Output on Dental Health Research by Means of Bibliometric Method**” the authors *Bakiyalakshmi* and *Praveena* have studied the dental literature for a ten years period. The authors have also compared the national and global output in dental science.

We will come out with more research.
