

**Third International Conference on Digital Data Processing**  
**University of Bedfordshire**  
**Luton. UK**  
**December 07-09, 2023**  
**[www.socio.org.uk/ddp](http://www.socio.org.uk/ddp)**  
**(IEEE Xplore. Papers should follow the IEEE template)**

Data grows voluminosly and exponentially with heterogeneity and complexity. A single organization or industry processes more than a few million transactions hourly and stores several petabytes of data. We live in a world of tremendous pressure to analyze and process data more efficiently where the Data analytics can reflect hidden patterns, incomprehensible relationships, intrinsic information relations, and segmentation. The data applications have introduced cutting-edge possibilities in every activity in our life. Thus, studying data and its underlying structure, dynamics of data relations, and newer data technologies are a never-ending process. The literature and research on data management are enormous; they do not sufficiently solve the data processing requirements.

Currently, the use of technology and interrelations among information pieces generate gargantuan amounts of data. Many studies tend to develop models and systems to analyse the voluminous datasets. Analysing the impact of data leads to application domains on decisions that have a systematic influence. Knowledge generated from the data analysis can enable the production of critical information for several domains.

Hence this conference reviews and discusses the recent trends, opportunities, and pitfalls of data management and how it has impacted organizations to create successful business and technology strategies and remain updated in data technology. This conference also highlights the current open research directions of data analytics that require further consideration. The proposed conference will discuss topics not limited to

**Data applications in various domains and activities**

Data in cloud

Real-world data processing

Data inaccuracy and reliability issues

Data Ecosystem

Business Analytics

New data analytics techniques

Physical and management challenges

Privacy and Security

Crowdsourcing and Sensing

Data modelling

Deep learning techniques

Data fusion

Descriptive analytics, Diagnostic analytics, Predictive Analytics, and Prescriptive analytics

Machine learning

Network optimization

Data in Biomedical Engineering

Data in Materials science and mechanics

Data handling and applications in domains  
Wireless Networking Data Management  
Data of Electronic & Embedded Systems  
Multi-media Systems Data  
Artificial intelligence Models and Systems Data  
E-Computing Data  
Renewable Energies Data

### **Publications**

DDP is technically supported by IEEE CPS. The DDP papers will be submitted for publication and indexing in IEEE Xplore. Besides, modified versions of the papers will appear in the following journals.

1. Journal on Data Semantics
2. Technologies
3. Data Technologies and Applications
4. Webology
5. Journal of Digital Information Management
6. International Journal of Computational Linguistics
7. Journal of Optimization
8. International Journal of Distributed Systems and Technologies

### **Important Dates**

Full Paper Submission: October 15, 2023  
Notification of Acceptance/Rejection: November 01, 2023  
Registration Due: November 25, 2023  
Camera Ready Due: December 01-09, 2023  
Workshops/Tutorials/Demos: December 08-09, 2023  
Main conference December 07-09, 2023

### **Program Committee**

#### **General Chair**

Ezendu Ariwa, Chair UK& RI IEEE TEMS, UK

#### **Program Chairs**

Ramiro Smano Robles, Instituto Superior de Engenharia do Porto Rua, Portugal  
Simon Fong, University of Macau, Macau -

#### **Program Co-Chairs**

Ricardo Rodriguez Jorge, Autonomous University of Ciudad Juarez, Mexico -  
Dion Goh, Nanyang Technological University, Singapore

#### **Publicity Chair**

Mohsin Beniysa, Abdelmalek Essaâdi University, Morocco
