Annual Proceedings of the Science & Technology Metrics

Third Edition

2021

Edited by

Pit Pichappan

Amir Reza Asnafi

Title: Science and Technology Metrics

Edition 3

(**http://www.socio.org.uk/stm**)

Editors Name: Pit Pichappan and Amir Reza Asnafi

Published by : Digital Information Research Labs

https://www.dline.info/newl/stmet%202021

Publisher Address: 5 Ramanujam Street, T Nagar. Chennai 600017. India

Edition: Third

Copyright: Digital Information Research Labs

ISBN: 978-93-5593-298-2

Contents

Editorial i

Research Papers

Terminological Analysis of Publications as a Method of Research Trends in Science 1
Mokhnacheva Yu.V., Tsvetkova V. A.

A Parametric Review of Bibliometric Studies Related to COVID-19 6
Prashant Kumar Sinha, Kanu Chakraborty, Subhranshubhusan, Shiva Shankar Mahato

Metric Evaluation in Structural Analysis of Ontologies based on Information Quantum 25
Maziar Amirhosseini

The Influence of Blockchain Technology on Digital Evolution 31
Samaneh Borji and Mohammadjavad Ashtari

Scholarly Communications across the Globe: Practices and Enrichment of Learning 41
Shiva Kanaujia Sukula, Shipra Awasthi

A Bibliometric Analysis of Dengue Fever Publications in Malaysia (1981 -2017) 48
Yanti-Idaya A.M.K, Nordiana A.K.S, Noorhidawati A., Mike Thelwall

Improvisation of Web Contents in Indian Agricultural University Library' Websites: Analysis and Suggestion 62
Sur Chandra Singha and Manoj Kumar Verma

Russian contribution to research on virology: bibliometrics analysis, 2000-2019 on Web of Science 68
Valentina Markusova, Anna Zolotova, Alexander Libkind

Angle, A New Indicator for Scientific Evaluation: Case Study of Quantity and Qualify On IIEES Publications 76
Maryam PakdamanNaeini, Amir Reza Asnafi

Assessment of Scientific Production of Payamnoor University Social Sciences Based on Scientometrics and Altmetrics indicators during 2010-2020 80
Anusheh Andisheh Tadbir, Amir Reza Asnafi and Ali Biranvand

Visual Analysis of Pandemic Disease literature in Global Health perspective: A Scientometric study 87
Ashish Kumar Ahirwal, Suresh Balutagi

Optimizers in Deep Learning: An Imperative Study and Analysis 99
Ajeet K. Jain, PVRD Prasad Rao, K. Venkatesh Sharma

Mapping of the Early Trends of 2019 Novel Coronavirus (COVID-19) using PubMed Literature 107
Kutty Kumar

Knowledge Graph Management Platforms: A Feature Based Review 115
Prashant Kumar Sinha, Sourav Debnath, Kanu Chakraborty, Sagar Bhimrao Gajbe

An Altmetric Analysis of Scholarly Publications from Earth and Planetary Science Discipline: An Exploratory Study of Indian Publications 138
Amit Nath, Sibsankar Jana

The Effect of Altmetrics Indices on the Scientometric Scores of the Most Prolific Authors in the Field of Environment 146
Ali Biranvand, Zohreh Cheraghi

Research Quality of Tumkur University Publications: An analysis 148
B Raviivvenkata*, Subhash Reddy B

Metric Evaluation in Structural Analysis of Ontologies based on Information Quantum 156
Maziar Amirhosseini

Editorial

Research evaluation is rapidly evolving multi-fold. It is becoming more advanced, more visible, more standardized, interesting to develop and deploy, and influencing society in many directions. However, the assessment systems undergo beyond being an instant number count tool. Researchers and users in the information assessment systems quickly realized that they needed to be able to organize and find the evaluation predictably. How can one ensure that the research assessment system is reliable, accurate, dependable, current, organized, standardized, efficient, relevant, and structured? These issues need to be addressed continuously as the research environment is dynamic and moving beyond prediction.

In this proceedings on Science & Technology Metrics, the readers will find research papers that attempt to address the above issues. Not all the presented papers are published in the proceedings, as a few authors of the documents made it clear that the research has to be more mature. The first edition was published in December 2019, and now we bring this third edition with more research directions.

We have published sixteen research papers presented at the STMet 2021 conference held virtually due to the COVID environment. We hope to bring the next edition as a physical event with more papers and authors.

The organizers and editors express their thanks to the authors who worked hard to bring the research in the form of finished papers.
