Comparision of Haar and SYM Wavelet Tranforms in the Detection of Magnitude for Earthquake Using Seismic Signals -  
Kishor Kumar Reddy C, Anisha P R, Narasimha Prasad L V, Vijaya Kumar B 1

A Novel Object Tracking Method based on Superpixels Cliques Appearance Model-  
Yi Ouyang 16

**Book Review** 30

**Conference Notification** 31

- Fifth International Conference on the Future Generation Communication Technologies (FGCT 2016)
- Sixth International Conference on Innovating Computing Technology (INTECH 2016)
- First International Conference on Real Time Intelligent Systems (RTIS 2016)

## **Editorial**

We are pleased to publish the first issue of the fifth volume of the **Progress in Signals and Telecommunication Engineering**.

Earthquake detection is a major area of research. In the first paper on **Comparison of Haar and SYM Wavelet Transforms in the Detection of Magnitude for Earthquake Using Seismic Signals**, the authors *Kishor Kumar Reddy, Anisha, Narasimha Prasad* and *Vijaya Kumar* have analysed seismic signals by using Haar wavelet transform and SYM wavelet transform in order to evaluate the energy, frequency, magnitude of the signal.

*Yi Ouyang* in the next paper on **A Novel Object Tracking Method based on Superpixels Cliques Appearance Model** proposed a method of learning the target-background appearance framework, which is based on super pixels principle histogram bins cluster method.

The published papers are marked by the presence of high technical quality.
